

Take the Worry Out of Enterprise Resource Planning

Does your ERP system give your business a competitive advantage?

Is your accounting, manufacturing and distribution on the same page?

Can your system easily adapt to changing business needs?

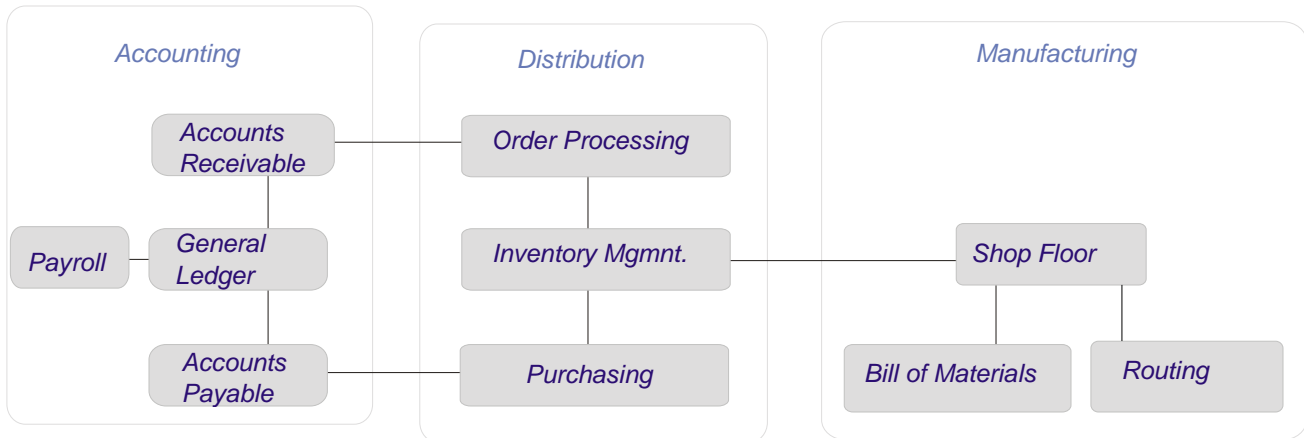

Does your ERP system fit your business?

You're looking for a provider who truly understands ERP.

You want a partner that keeps your business running smoothly and helps you grow. No surprises. No worries. Centurion Data Systems understands because we're business owners, too - not just engineers. We take the time to understand your business objectives so we can tailor our ERP system to support your success.

Since 1990, we've worked with businesses to manage their systems. We anticipate your needs so you can focus on your business.

Centurion Data Systems ERP provides an extremely robust and fully integrated accounting, manufacturing and distribution application in an infinitely customizable environment. What does this mean to your business? It means that you can utilize as few or as many of the standard components as you need. All of the following standard components are fully customizable to fit perfectly with your business. Gone are the days of having to fit your business to your ERP system.

Additional customized components can be engineered to meet your business exceptions giving you a distinct competitive advantage. Some examples include: Asset Tracking, Consumable Goods Tracking, Estimating, Private Labeling, Lot Control and Audio/Visual Shop Floor Alerts. Call to learn how Centurion Data Systems ERP can help your business.
