

# Managed Data Backup

*Restore files/Disaster recovery.*

## Safeguard Vital Business Data

*Provides a professionally managed backup with a high degree of reliability, security and redundancy that safeguards vital business data.*

*"In 2013, one of our backup service clients experienced a fire that completely burned their offices destroying all computer equipment. By Monday afternoon we provided and installed equipment at an alternative site with all data recovered from our off site backup storage. More commonly, a user might discover that they accidentally deleted their complex spreadsheet two weeks ago. By default we save deleted or changed files for 30 days so that spreadsheet can be easily recovered."*

*Centurion Data Systems eliminates the purchase, installation and maintenance of costly software and media which become obsolete as quickly as your computers. The difference from other backup services is that your Backup is managed by our IT professionals and except for the initial decision making, does not require any tasks to be performed by you.*

*Finally, a backup solution that grows with your business, is extremely easy to implement, and offers benefits not available with other options.*

- **Easy Implementation** – Centurion Data Systems provides a data backup server which connects to your local network. Our engineers perform data backup server configuration.
- **Quick Data Recovery** – The backup server stores a copy of your data providing on demand file restoration. This includes deleted or changed files as far back as you wish (normally 30 days).
- **Off-Site Storage** – Data is transferred to our in-house data servers for off-site storage and a high degree of redundancy.
- **High Degree of Security** – File transfer between your local network and ours utilizes high-level data encryption.
- **Daily Verification** – Backup logs are examined daily by one of our IT professionals.
- **Monthly Statistic Logs** – Reports of total data footprint.

*Call today to learn how Centurion Data Systems Managed Backup service can help your business.*
